

SAFEGUARD-PRO

SERVICE CONTRACT FOR LAP LASER SYSTEMS

EN

REPAIR AND MAINTENANCE OF LASER SYSTEMS
FOR MEASUREMENT AND PROJECTION

SAFEGUARD-PRO THE FULL SERVICE PACKAGE FOR LARGE AND MEDIUM SIZED LAP LASER SYSTEMS

SAFEGUARD-PRO is our solution for professional maintenance and support of your systems from one source. Preventive actions and system care as well as immediate support in case of malfunction assure optimum availability of your operating equipment.

Our service covers the complete process including scheduled maintenance, regular inspection and repair of all components. Maximum availability of your production capacity is our highest priority. To reach this objective we evaluate the performance of all elements and ensure your system will be up to date.

Scope of maintenance:

- One on-site appointment per calendar year including all costs
- Technical cleaning for preservation of function
- Adjustment and calibration of all relevant components

Scope of inspection:

- Testing of technical conditions
- Determination of maintenance activities

Scope of repairs:

- Free-of-charge repair of all system components including spare parts
- Free-of-charge replacement parts or components for the duration of repairs
- Discounted spare parts for local stock

Scope of enhancement:

- Software maintenance and updates

SAFEGUARD-PRO is offered for systems with an original price of more than 50,000 EUR. In the first five years of use you may subsequently conclude the contract. Without additional costs. For older systems SAFEGUARD-PRO is only available after a general overhaul.

YOUR BENEFITS

SYSTEM AVAILABILITY

Preventive maintenance and system care minimize the risk of failures and extend service life.

COST TRANSPARENCY

SAFEGUARD-PRO covers all occurring costs for maintenance, repairs and deployment of personnel, including material and travel costs. The annual service fee remains constant.

SCHEDULED SERVICE

We coordinate service calls in due time and take your planned shutdowns into account.

QUALIFICATION

Your systems will only be maintained by our specialists or by qualified partners.

QUALITY

LAP processes are certified according to ISO 9001. For all checks and services done on-site you will receive a certificate for your quality management.

SAFEGUARD-PRO PROFESSIONAL SERVICE BY LAP

For more than 30 years, LAP has been developing, manufacturing and distributing laser measurement systems, line lasers and laser template projectors for industrial and medical applications. LAP products are high-precision devices **Made in Germany**.

Using LAP laser systems, our customers improve performance and increase the quality of their products as well as the effectiveness of their processes.

As a result of continuous product innovation, LAP has become a world leader in lasers for projection and measurement.

LAP products are setting the standards in a wide range of markets from manufacturing to heavy industrial environments and medical applications.

Environmental protection is important to us. We use solar panels, green electricity and roofs planted with grass. Our production is planned by standards of sustainability.

Quality has always been part of our commitment. We are content if you are. We know your high demands. To meet your requirements, the quality management of LAP is certified by DIN EN ISO 9001:2008 for industrial products and by EN ISO 13485:2007 for medical engineering products.
